“Having been a PE coordinator for five years I felt I was an experienced PE leader. However, by the end of the 5-day course I felt I was an advanced PE leader because I gained the knowledge of how to lead my subject and make a difference to children and my colleagues.”

“Influential to me as a PE coordinator and has made me feel better and confident as a leader.”

“A very useful course with plenty of opportunities to converse with other practitioners and share best practice.”

Please see overleaf the modules in more detail >>>

Whilst attending all 5 days is recommended and will help maximise the impact of the training, delegates may choose to attend as many or as few days as appropriate. This will be dependent on delegates own experiences, confidence in delivering high quality PE provision in school, individual professional development and performance management objectives.

MODULE 1: High Quality Teaching and Learning

This module focuses on identifying what high quality PE lessons look like, higher order questioning, developing an engaging curriculum, increasing subject knowledge and effective self-review.

MODULE 2: The Role of the PE Coordinator

This module provides delegates with knowledge about the role of the PE coordinator. Delegates will review their PE curriculum, and will be introduced to an overview of health and safety and risk assessment, creating safe and stimulating learning environments, and action planning for the next school year.

MODULE 3: Inspiring, Motivating and Challenging Pupils in PE

This module puts PE at the heart of the whole school, and explores developing a vision for PE in school and ways to recognise and reward successes. Delegates will look at identifying gifted and talented pupils and will explore using the inclusion spectrum to support S.E.N.D pupils.

MODULE 4: Assessment and Differentiation

In this module, delegates will focus on why, what and how we assess for learning in PE. They will have the opportunity to observe pupils taking part in a PE lesson, and will consider the relevance of their observations back in their own schools.

MODULE 5: Leadership and Management

This module will support PE coordinators to develop their own leadership and management skills to drive impact within and beyond the PE curriculum. It will include self-evaluation of their own skills, goal setting, coaching and mentoring colleagues and accessing network support through working in small PE development groups.

All of the above modules will be delivered by **Angela Cotter**, who is currently the **Primary Education Director at Kingsbury School Sport Partnership CIC** and works locally with our partner primary schools to ensure high quality PE and school sport experiences for their pupils. Angela has been a teacher in Birmingham schools for over 20 years, teaching in KS1 and KS2, and was a PE coordinator and Team Leader for Physical Education in addition to her class teacher role.

Angela was a Primary PE Teaching and Learning Consultant and Lead Practitioner with Birmingham Advisory Service for many years, and continued to perform this role with The Learning and Assessment Service available to Birmingham schools. She is also a National Faculty Tutor with Youth Sport Trust, delivering on their Primary PE programmes.

Angela has worked with over 25 schools in the past 2 years delivering this programme of support, with PE coordinators reporting on how valuable this has been in impacting on their success in their role in school.

To book onto any of the above modules please complete the enclosed booking form or for more information please contact:
